

PORTABLE, EMERGENCY AND TEMPORARY HEATING & AIR CONDITIONING HIGH EFFICIENCY MOBILE FILTRATION UNIT

ASCRQA18 Industrial Filtration Unit

The ASCR is designed for construction Filtration. This unit uses various layers of Filter media as required. The unit is mobile on casters. It is delivered to the jobsite, set up and test run prior to job start. The unit is readily moved from space to space. It is able to be ducted out or used in a recirculation capacity. The unit is variable speed providing quite sufficient air movement for all applications of dust and odor removal.

This unit is used for filtration primarily in construction areas such as Tenant Improvement and sheet rock remodeling. The fan is variable speed moving from 3,000 CFM to 800 CFM. The filter media is interchangeable and includes as much as four layers of varying filtration media. The unit may be ducted so as to exhaust air as well as filtering and recirculating depending on the space requirements.

- **Voltage:** 120V / 1Ph
- **Amps:** 3.5
- **Height:** 37"
- **Width:** 28"
- **Depth:** 35"
- **Weight:** 85#
- **NEMA Plug:** 5-15P

Built in Controls: yes, Variable Fan speed, Unit on casters, readily ducted.

Application: Construction, Tenant Improvement, Sheet Rock, Remodel.
